

Vibrating Screen

Link: [Gallery](#) [Get this product price](#)

The circular vibrating screen is a new vibrating screen vibrating in a circle, with multiple layers and high efficiency. This screen adopts barrel type eccentric vibration generator, and eccentric block for swing adjustment. **Vibrating Screen** has a long vibrating line, various screen specifications, reliable structure, and vibrating power and specially designed for quarries stone screening.

Features of Vibrating Screen

1. Structure of the circular vibrating screen is new, advanced in technical parameters, high in capacity and screen ratio.
2. This screen adopts eccentric draft and block to adjust swing, operation and maintenance is quite convenient.
3. This screen adopts spring steel knitted screen nest or perforated screen plate, which has long life span and its screen holds are not easy to be stopped.
4. This screen adopts the rubber vibration isolation spring, which has longer life span, low noise and stable resonance region.

Application of Vibrating Screen

Vibrating Screen is widely used for products grading for ore, construction materials, traffic, energy, chemistry and other industries, which is ideal equipment for crushing and screening assembly. While small meshed screen is installed, wet and sticky materials can be screened only by adding water to spray.

Technical Data of Vibrating Screen

Model	Screen size (mm)	No. of Layer	Screen mesh (mm)	Max. feed size (mm)	Handling capacity (t/h)	Motor power (kW)	Vibrating frequency (r/min)	Double swing (mm)
2YZS1237	3700×1200	2	3-100	400	10-80	11	750-950	5-9
